RECENT AND UPCOMING ENGINEERING MANPOWER COMMISSION PUBLICATIONS

Note: all EMC surveys are now available in the form of machine-readable media. For more information, contact the AAES Publications Department at the address below.

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1989 (forthcoming in July, 1989)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1988 (forthcoming in July, 1989)

An abridged version of the *Special Industry Report*. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1988

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1988

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the United States. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

ENGINEERING AND TECHNOLOGY DEGREES, 1988

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $12.00

TO ORDER: Member prices are available to members of AAES member societies, employees of Industry Affiliates, and firms/educational institutions that have participated in the study to be purchased. Please include society affiliation and membership number, Industry Affiliate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Prepayment required; pro forma invoices provided on request. Orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

1989 Officers

George Kotnick, Chairman, Board of Governors

Richard J. Gowen, Past Chairman

Curtis J. Tompkins, Secretary/Treasurer

Daniel De Simone, Executive Director

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data on questions relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin,* which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1989 Officers

Donald C. Brown, Chairman
Dr. William M. Sangster, Vice Chairman and Chairman, Ways & Means Committee
Luke H. Noggle, Vice Chairman and Chairman, Education Committee

Dr. Frederic Beaufait, Chairman, Degrees Committee
Dr. Edward T. Kirkpatrick, Chairman, Educational Relations Committee
Dr. Glen Vanden Berg, Chairman, Enrollments Committee

AAES Staff

R.A. Ellis, Director, Manpower Studies

Gordon Davis, Director of Publications

ACKNOWLEDGEMENTS

The Engineering Manpower Commission wishes to express its grateful appreciation for the cooperation of th hundreds of organizations that provided the data on which this report is based.

Combined Summaries 233

INTRODUCTION TO VOLUME II

This is the 21st annual report from the Engineering Manpower Commission (EMC) on enrollments in engineering and engineering technology in the United States. Volume I of the study covers engineering; Volume II covers engineering technology. Data are for Fall, 1988.

Volume II provides detailed data on enrollment in engineering technology programs for all students and for women, Blacks, Hispanics, Asian Americans, and American Indians. (A sixth group, foreign nationals, is also tracked in EMC's surveys of engineering enrollments, but is not treated in reports on engineering technology.) Enrollment is tabulated by the year in school--first year, second year, etc.--for all full-time students; in addition, the tables include data on the enrollment of post-baccalaureate students. Part-time students are tabulated separately, irrespective of their year in school.

In the survey for Fall, 1988, EMC has returned to an earlier format for the presentation of these data, in which information for both associate-level and bachelor-level technology programs are presented in the same tabulations. Virtually no information has been suppressed (we no longer distinguish between 3rd and 4th-or-later-year enrollment in associate degree programs). This supports more efficient packaging of the data and also facilitates the identification of those schools which offer both kinds of programs. Such institutions do not adhere to a uniform set of conventions to classify their students; some invariably treat all first-year and second-year students as associate degree candidates, and all third-year or higher-level students as bachelor degree candidates. In such cases there will be no first or second year enrollments reported for the bachelor's programs. Other schools may report first and second year students in both kinds of programs.

Two basic types of tabulations are provided, in addition to summary tables. The first summarizes overall enrollment, across all curricula, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering technology programs.

The second general type of tabulation provides detailed enrollment data for each technology program offered by these schools. Programs are listed within some twenty broad disciplinary groups (e.g., chemical, civil, etc.); subtotals are provided both within these listings and in separate summary tables. Within each broad discipline, programs are listed alphabetically by their detailed titles, within schools and states, thus preserving distinctions such as the difference between programs in civil engineering technology and surveying engineering technology.

NEW FEATURES OF THE REPORT

The major change for 1988 is the consolidation of statistics for associate and bechelor-level degrees, as noted above. Other changes adopted for the 1986 and 1987 surveys have been continued. A significant shift was EMC's decision in 1987 to stop tracking enrollment in pre-engineering transfer programs offered by junior or community colleges, or similar "3-2" transfer programs offered by four-year institutions that do not have their own engineering programs. There were several reasons for this change, including the fact that such programs are not engineering technology curricula. The most compelling factor, however, was simply that we were covering only a fraction of these enrollments--those pre-engineering curricula that happen to be offered by schools that also have technology programs. To provide a realistic enumeration of the total number of pre-engineering students, EMC would need to expand its surveys to cover the hundreds of additional two- and four-year colleges that offer these programs. Our judgement is that if we cannot provide a meaningful measure of these enrollments, then we should not report on them at all.

The pre-engineering programs are important. EMC's separate surveys of engineering enrollments show substantial growth at the upper-class levels, when the ranks of traditional engineering students are swelled by transfers from other kinds of colleges. EMC's earlier statistics were of little or no help, however, in estimating the size of this flow of students into engineering, and they contributed to a misleading overestimation of the size of engineering technology enrollments. The change results in a drop of roughly 2,700 students in the 1987 survey, compared to 1986, mostly in associate-level programs labeled "pre-engineering" or "engineering science" (here, the latter term applies only to programs like Optics Technology).

All tabulations draw on a master data base on engineering programs, in order to provide accurate, consistent descriptive data. The data base is now used to generate the laser-printed questionnaires that are used to collect the statistics, as well.

Major efforts have been made to obtain full cooperation from participating institutions. In addition, when partial responses have been possible--for example, some schools cannot report the numbers of women who are enrolled in each specific combination of a technology program and year in school, but can report how many women are enrolled in each program, overall--then the overall data are pro-rated to generate reasonable approximations for data entry. In addition, detailed codes are employed to report the precise adjustments used to deal with every response, as noted earlier.

The elimination of separate estimates for missing data means that EMC's figures for total engineering enrollments are slightly lower than they would have been if the previous methods had been retained. Those estimates were eliminated because they are now infrequently needed, and making them calls for heroic assumptions on our part. This change never affected EMC's data on engineering technology, for we did not make missing data estimates for those programs. The Commission has never attempted to provide comprehensive coverage of all engineering technology programs, in part because unaccredited courses are offered at hundreds of community and junior colleges not ordinarily covered in EMC's surveys. Another problem has been a degree of inconsistency from one school to the next, or even from one year to the next in the same school, in deciding just what should or should not be reported as an engineering technology program. In order to improve the consistency of the technology time series data, EMC has opted to concentrate on coverage of schools with ABET-approved courses (see comments on coverage and response, below).

The Engineering Manpower Commission has been reviewing the contents and format of its educational surveys for the past several years and is contemplating extensive changes in the packaging of its enrollment surveys in the near future.

More detailed commentary on these data will be issued simultaneously with these reports in issue No. 95 of EMC's *Engineering Manpower Bulletin*. Any questions regarding the course content or other details of specific engineering or engineering technology programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies. EMC can provide these data in the form of machine-readable media. For prices and ordering information, see the inside back cover.

COVERAGE AND RESPONSE

In engineering, the 1989 engineering enrollment study covers 320 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these programs are newly initiated and have not been included in previous reports from EMC. These listings provide a comprehensive enumeration of enrollment in engineering programs available in the United States today.

As noted above, in engineering technology the 1988 enrollment survey includes data from 310 schools, including all of those with ABET-approved programs. The decision to strive for a comprehensive treatment of all schools with ABET-accredited technology programs is a change from past EMC practices and is intended to improve the stability and comparability of the year-to-year statistics gathered by these studies. As in the past, the technology data also include some schools without ABET-approved programs at that level; however, many of those institutions do have ABET-approved engineering programs.

In all, well over 500 institutions of higher education are covered by the 1988 enrollment surveys.

In these counts of institutions, EMC abides by local preferences in deciding whether or not to count a school's branches as separate entities. Thus all of the various locations of the Pennsylvania State University are counted as a single institution, while in other cases different branches are treated as separate schools.

ERROR CHECKING

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of enrollment level and school were checked against original questionnaires. Results for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. Instances of both sorts of problems were found and fixed; in some cases, reporting errors on the part of participating institutions were identified, while in others, significant shifts in patterns of engineering enrollment were confirmed.

Program-level ABET accreditation codes were checked and updated for this study. Corrections were also made in institutional-level school type and accreditation codes used by EMC. The use of laser-generated questionnaires has helped to improve the consistency and accuracy of all the descriptive data in these reports, by providing feedback to the schools on the program titles and other codes used by EMC. Each form includes pre-printed information specific to the institution, such as program titles, accreditation statuses, etc. This simplifies data entry.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three-position alphabetical coding system to denote school types, institutional-level accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools.

"F" denotes federally-sponsored schools.

"N" means non-sectarian, non-profit private schools.

"R" denotes religiously affiliated private schools.

"P" denotes proprietary schools.

A: Accreditation:

"E" means at least one engineering program is acceded-ited by ABET.

"T" means that at least one technology program is accredited by ABET.

"B" means that the school has ABET-approved courses in both engineering and technology.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by recognized regional accreditation agencies-- such as the Southern Association of Colleges and Schools.

"X" means none of the preceding codes apply.

R: Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in the survey of 1986 enrollment. Codes are listed here in alphabetical order; however, they were assigned as needed, not necessarily in alphabetic order, so the ordering is not significant. Foreign nationals are not tracked in EMC's enrollment surveys of engineering technology, so code that are specific to those students should not appear in this volume of the report.

"A" means all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for a specific population group. The numbers for all enrolled students are not affected.

"B" is similar to "A," except that details were provided for women only; details for minorities and for foreign nationals were not provided.

"C" is similar to "A," except that details were provided for women and minorities only; details for foreign nationals were not provided.

"D" is similar to "A," except that details were provided for minority groups and foreign nationals only; details for women were not provided.

"E" is similar to "A," except that details were provided for women, some of the minority groups, and foreign nationals only; details for other minority groups were not provided.

"F" is similar to "A," except that details were provided for women and foreign nationals only; details for the minority groups were not provided.

"I" means that part-time enrollment was not separated out from full-time enrollment.

"J" means that part-time enrollment was not separated out from full-time enrollment for some detailed breakdowns.

"K" means that part-time enrollment was not separated out from full-time enrollment for some details, and in addition, some or all minority data were missing altogether.

"P" means that some data were developed by EMC, by pro-rating accurate aggregates (i.e., information on all female enrollment) among the various programs at a school.

"Q" means that some data were pro-rated by EMC, and in addition other data were missing altogether.

"7" denotes a substituted response using data originally submitted for Fall, 1987. In addition to all nine of the DeVry campuses in the U.S., six other schools were treated with these older data. In the cases of four of these schools, details were also missing: the New York Institute of Technology (all details); Murray State University in Kentucky, and Truckee Meadows Community College in Nevada (minority data missing); and the SUNY College at Buffalo (data missing on Hispanics, Asians, and American Indians).

"6" denotes a substituted response using data originally submitted for Fall, 1986. Two schools were treated with such substitutions: the University of New Haven in Connecticut, and Ocean County College in New Jersey.

"S" denotes a substituted response using data originally submitted for Fall, 1985. One school required this treatment: Middlesex County College in New Jersey.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR7: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1987 response. "TAR" code of NTB: this is a private, non-sectarian school with ABET-accredited technology programs and missing details for minorities.

Program-Level Accreditation Codes: These are used only in the tabulations for specific curricula:

"B" denotes ABET accreditation for the program at the bachelor's level.

"M" denotes ABET accreditation at the master's level; this code applies only to engineering programs.

"A" denotes ABET accreditation at the associate degree level.

"N" denotes programs with no ABET accreditation. Some associate-level programs may be tagged with a "B" code to denote the existence in the same school of an ABET-approved program at the higher level, in cases where there is no ABET approval for the associate degree.

Engineering Technology Discipline Category Abbreviations:

AER = Aeronautics and Related
ACN = Air Conditioning/Refrigeration/Heating
ARC = Architectural
AUT = Automotive
CHE = Chemical
CVL = Civil
CMP = Computer
CON = Construction
DRF = Drafting and Design
ELC = Electrical
ELM = Electromechanical
ELX = Electronic
ENS = Engineering Science (NOT in the sense of Pre-Engineering)
GNL = General Engineering Technology; includes Pre-Engineering Technology
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials
MEC = Mechanical
MGN = Mining/Metallurgical/Welding
NUC = Nuclear
SYS = Systems
OTH = Others, including Biomedical, Agricultural, Ceramic, Environmental, and Petroleum

MISCELLANEOUS NOTES

The College of Engineering at the University of Akron has begun its own bachelor's-level program in engineering technology, separately from the programs operated by that institution's Community and Technical College. Several schools have stopped reporting separate associate-level enrollment in engineering technology (some may still award the degrees from time to time): the University of Maine at Orono; Anoka-Ramsey Community College in Minnesota; the University of New Mexico; and Franklin University in Ohio. The Morrison Institute of Technology now awards only the associate degree in engineering technology. The Kansas Technical Institute changed its name to the Kansas College of Technology; the Tennessee State Technical Institute at Knoxville became the Pellissippi State Technical Community College.

RECENT AND UPCOMING ENGINEERING MANPOWER COMMISSION PUBLICATIONS

Note: all EMC surveys are now available in the form of machine-readable media. For more information, contact the AAES Publications Department at the address below.

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1989 (forthcoming in July, 1989)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1988 (forthcoming in July, 1989)

An abridged version of the *Special Industry Report*. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1988

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1988

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the United States. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

ENGINEERING AND TECHNOLOGY DEGREES, 1988

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $12.00

TO ORDER: Member prices are available to members of AAES member societies, employees of Industry Affiliates, and firms/educational institutions that have participated in the study to be purchased. Please include society affiliation and membership number, Industry Affiliate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Prepayment required; pro forma invoices provided on request. Orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.
